

## **Elementary Computer/Internet Acceptable Use Agreement**

My teacher has explained the Wayne County School System Computer/Internet User Agreement to me and I have been given an opportunity to ask questions about it. I know that my misuse of the computer and/or the Internet could lead to serious consequences that might include being suspended from school or being restricted from using computers. I agree to do the following things while I am using the computer:

I will not tell anyone that I meet online any personal information about myself such as my name, address, or phone number or anyone else's name, address, or phone number.

I will not give my account name or password, if I have one, to any other student.

I will not enter anything in the computer that contains ugly or rude language or pictures.

I will not bring any software from home to use on school computers.

I will not try to go to Internet sites that have inappropriate pictures or words. If I accidentally go to a site that has information that I think should not be seen by students, I will tell my teacher right away and not show it to other students.

If I use information from the Internet in a report, I will make sure that I follow the rules my teacher gives me for documenting my sources of information.

I will not do anything to deliberately harm a computer, computer software, or the computer network.
